

Creating a git repo

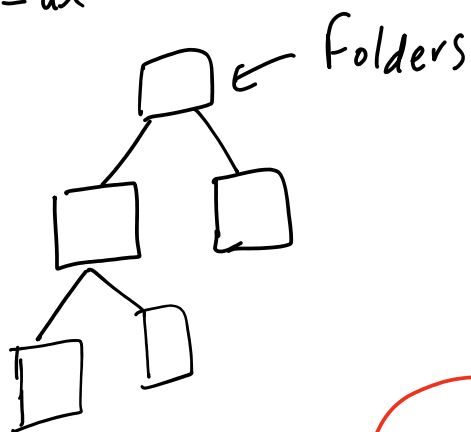

Wednesday, 4 January 2023 4:57 PM

Github → Hosting service

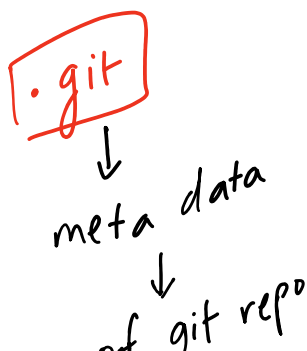

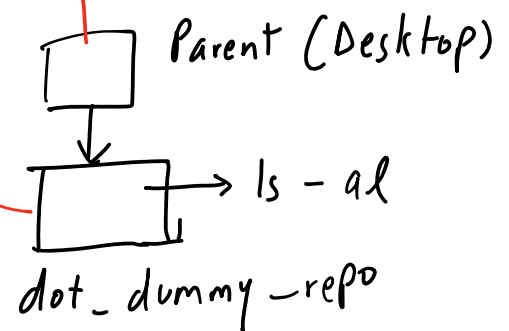

To see a hidden folder in Mac, `Cmd + shift + . (Dot)`
`git status` → checks the status of repo.
`git init` → adds the folder as git repo.

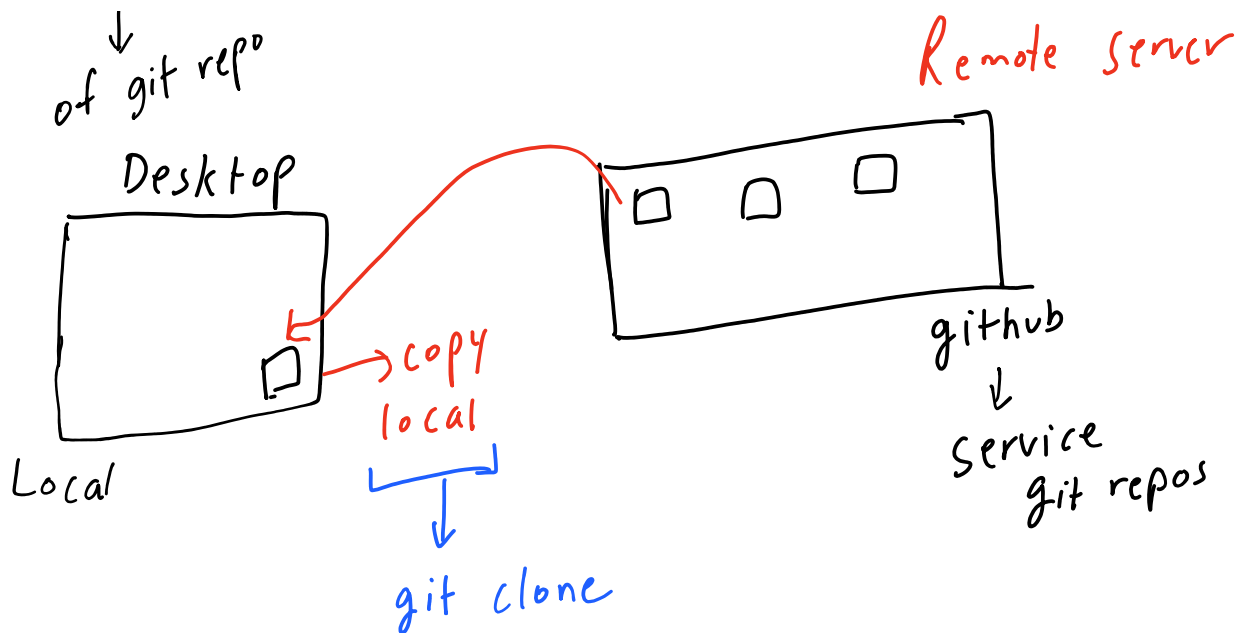

★ `ls -al`

- ① .
- ② ..
- ③ .git

Remote server

Once we clone, the repo in our local system a folder is created in our desktop.

Once we edit some changes in the code, run git status,
It will show modified: helloworld.py

To see what changes have been made; **git diff**
