

Git add → add file to track

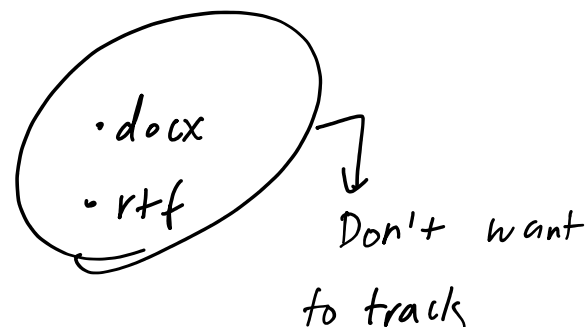

↳ New file → add file to track

↳ old file → staging index

Git restore main.cpp → If you made changes in the main.cpp & you don't want that change and revert it to original.

Git Repo → .cpp  
 .js  
 .css

We create a .gitignore, then inside it we add

\*.txt  
 ↓ ↳ file extension  
 All the file names

↓      ↳ file extension  
All the file names
